### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jong Lee on 3/3/2010.

The application has been amended as follows:

#### **IN THE CLAIMS:**

In independent claim 3: line 19, insert --provided by the lighter-than-air gas-- after "force".

### **Reasons for Allowance**

2. The following is an examiner's statement of reasons for allowance: The invention, "Floating Solar Chimney", is in the field of solar collectors in the form of chimneys for the utilization of solar energy to heat incoming air. Disclosed is an adjustable, free-standing, floating solar chimney that is comprised of a main chimney unit, a base unit, a dynamically variable folding unit, and a chimney seat. The main chimney unit consists of a balloon type ring filled with lighter-than-air gas that is capable of floating supported by a supporting ring made of rigid, light-weight material. There are also rings incorporating valves for the allowance of incoming air into the chimney unit. The base unit supports the main chimney unit and comprises an upper ring and a lower ring with a smaller diameter than the lower ring. The dynamically variable folding unit is

coupled to the base unit and has an accordion-like configuration that consists of similar balloons as in the main chimney unit. The folding unit also comprises valves for the incoming of air. The chimney seat is configured to accommodate the base unit and dynamically variable folding unit. The unit as a whole is capable of withstanding high winds, while maintaining shape to ensure maximum solar absorption/conversion. The prior art of reference, U.S. Patent 5527216 to Senanayake also discloses a solar chimney, utilizing balloon rings filled with lighter than air gas, and support rings. Senanayake however does not disclose the unique base unit, in combination with the dynamically variable folding unit or chimney seat. De Luca (WO2004/036039) teaches a similar base unit that allows bending of the chimney in high winds. This reference, however does not show the benefits of base unit, dynamically variable folding unit and chimney seat by providing a secure support for a chimney unit to maximize solar absorption: the upper and lower ring ensure proper support, while the accordion-like configuration allows extreme bending in all directions depending on the incoming wind, and the chimney seat ensures that the entire unit will remain secured on the ground. The prior art of reference do not show this arrangement nor are the benefits shown. For these reasons, the invention is unique and allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to AVINASH SAVANI whose telephone number is (571)270-3762. The examiner can normally be reached on Monday- Friday, alternate Fridays off, 7:30-5 EST.
